KUNUNURRA & EAST KIMBERLEY

2020 VISITOR GUIDE

Kununurra Visitor Centre, East Kimberley, WA

START YOUR KIMBERLEY ADVENTURE WITH US.

visitkununurra.com

The Kununurra Visitor Centre is the best place to familiarise yourself with all there is to see and do in the East Kimberley. Our friendly and knowledgeable staff are here to answer all of your enquiries; from planning your trip on-line or over the phone, to helping you out in person at the Visitor Centre. Offering tailored itineraries, exceptional local knowledge and a free booking service, the Kununurra Visitor Centre is your one stop shop!

The East Kimberley screams adventure! Whether you're 4wd-ing the dusty Gibb River Road, trekking through the 360 million-year-old Bungle Bungle (Purnululu National Park), cruising the magical expanse of Lake Argyle or flying over Mitchell Falls, there really is something for everyone! At the Kununurra Visitor Centre, we are passionate about our region, and our tourism operators.

Take a look at our website visitkununurra.com for some great ideas, get in touch or book your accommodation and experiences. If it's inspiration you're after, our Instagram and Facebook pages are sure to impress [@VisitKununurra](#) and be sure to share your adventures with us, while you're here [#VisitKununurra](#).

See you soon, in the Kimberley!

WELCOME TO THE EAST KIMBERLEY

As Chair of MG Corporation, I extend visitors a warm welcome to Miriuwung and Gajerrong country. MG Corporation receives and manages the benefits transferred under the Ord Final Agreement to the Miriuwung and Gajerrong people, who are recognised under Australian law as holding native title over a determination area spanning almost 14,000 square kilometres of land in the East Kimberley region.

The area boasts a pioneering history and includes vast agricultural developments, Lake Argyle and its surrounds, pastoral interests and conservation land, as well as the Kununurra township itself. Traditional Miriuwung and Gajerrong interests also extend into portions of the Northern Territory.

Welcoming visitors to our land has been a part of MG culture for thousands of years, offering them safe passage and protection of their spiritual being throughout their journey.

Miriuwung and Gajerrong people continue to manage and maintain these traditional protocols and proactively work to preserve and enhance MG language and culture. MG country has much to offer visitors, whether swimming in Lake Argyle or local springs, visiting some of the local art galleries, camping or hiking in the beautiful countryside, fishing in the Ord river, canoeing on Lake Kununurra, or hiking in some of our national parks and conservation areas. Once again, on behalf of Miriuwung and Gajerrong people as traditional custodians of the area, I welcome you to our country and hope that you enjoy your time in the East Kimberley.

Lawford Benning
Chair, MG Corporation

FLIGHTS FROM MELBOURNE

All aboard the Kimberley Express!

2020 is a very exciting year for the East Kimberley, as for the very first time direct flights will be available between Melbourne and Kununurra. Three times a week between May and August planes will head from the hustling, bustling coffee capital of Australia to Kununurra, home of some of the world's most breath-taking natural and man-made attractions. For many it will be the best opportunity there's ever been to explore the highlights of our region. Flights begin just before the opening of the Ord Valley Muster in May and are timed to give visitors great options for short or longer stays. Flights will leave Melbourne on Tuesdays, Thursdays and Saturdays and depart Kununurra on Wednesdays, Fridays and Sundays.

For those based in the East Kimberley, this is also a wonderful opportunity to have a spectacular city break to Melbourne, maybe catch a show, watch some footy, get in some world-class shopping or visit the many exhibitions and museums of this great city.

DENISE AND MICHAEL'S 7 DAY EAST KIMBERLEY BASH

Well, we never thought we'd be writing about our travels! We're Denise and Michael, heading towards our 70s now but with plenty of life and time on our hands. We've been exploring the wonderful East Kimberley and you'll be reading about our adventures and suggestions in this magazine. There are remarkable things to do here for independent travellers, families, thrill seekers and oldies like us. We hope you enjoy our story.

Day 1

We went straight to the Visitor Centre to get some maps and advice. We always do that when we hit a new town; talking to someone face to face is so much better than looking things up online. We picked a beautiful shady spot at a caravan park near the river and set up camp. That night we went to one of the hotels got a steak and watched the footy on the big screen. What's the saying, 'Happy wife, happy life'? How about 'Happy Hubby, hit the pubby'!?

Day 2

It was Saturday and we visited the market in the morning; live music, local honey, mango smoothies, jewellery and even some little kangaroo orphans from the local shelter. So sweet!

In the afternoon we went on a cultural sunset tour, visiting the public art works around town, getting a traditional welcome from the Aboriginal tour guides, listening to some singing and didgeridoo, and watching the sun go down with them from Kelly's Knob, the highest point in town.

Saturday night was movie night at the town's open-air cinema – we drove in, settled down with a picnic and watched the big screen under the stars.

Day 3

Up at dawn for a 2-hour scenic flight – there are so many beautiful places around here; we flew over the agricultural area and saw all the mango and sandalwood plantations, then over breathtaking Lake Argyle, 70km long, shining blue and dotted with little islands. Then the Bungle Bungles came into view; this was one of the big must dos we had for our trip and seeing it from the air is simply wonderful. After that we flew back over the Argyle Diamond Mine – we were determined to see it before it closes at the end of 2020. Michael's promised to buy me a pink diamond (if he wins the lottery!)

At 11:30 we got picked up for our cruise on Lake Kununurra. This 55km stretch of water connects the town to Lake Argyle and the cruise is one of the best we've ever done. The boat goes at quite a pace and the skippers are always on the lookout for anything to show us. We saw the lovely little Jacanas (known as 'Jesus birds') walking on the lily pads, then a Jabiru watching us from the shore, and then some bigger beasts; some healthy freshwater crocs enjoying the sun. On the way back we stopped for afternoon tea at a riverside camp and had fresh scones and fruit. Fresh scones are a pretty big thing up here and they all compete with each other in an annual 'Scone Off!' Cruising back to town as the sun goes down (ooh, a rhyme!) is picture perfect and we posted loads of photos to our friends that evening.

Australia's North West Tourism

Day 4

We'd heard about El Questro Wilderness Park and wanted to sit back and relax so we booked a full day tour. They picked us up at the caravan park at 6.30 and we drove out to the famous Gibb River Road, learning about the region's history and agriculture on the way. First stop is Emma Gorge and what I call a healthy hike takes you to the waterhole itself. We both jumped in for a welcome swim! Then it's on to Zebedee Springs which are warm all year round – it's so romantic sitting in the pools and looking at the tropical trees. Then to El Questro station for a fabulous lunch and a cruise on the Chamberlain River. I didn't realise there was so much water in the Kimberley; waterfalls, gorges galore, rivers and lakes. No wonder so much produce comes from here!

Day 5

Today we drove to Wyndham. We stopped off at Parry Creek Farm for a scone... they are ranking pretty high on our list! Then on to the billabong which was teeming with bird life – Brolgas, Jabiru, Sea-eagles, even some Gouldian finches if you are lucky. Michael loves bird watching so was in heaven out there. On to Wyndham town and we picked up a crocodile pie at the café, spent a fabulous hour at the museum and then to the world famous 5 Rivers Lookout where we gazed down at the mass of water heading to the sea.

Will we ever get tired of beautiful sunsets? I don't think so! A glass of wine and some nibbles overlooking the river. Hard to beat!

Australia's North West Tourism

Day 6

This morning we had a drive around town and visited the beautiful art galleries and jewellers. There are so many talented artists based in the region. Space is limited in the caravan, but we bought a little painting of a Wandjina, the Aboriginal spirit of the Kimberley, as a souvenir.

A café lunch and then we drove up to Lake Argyle, passing beautiful boab trees on the way. We stopped at the Homestead for a look round the museum. This is the house built by the Durack family in the 1890's and then moved when the Lake was created in the 1970s. Inside we learned about their incredible journey from Queensland, taking 2 ½ years to drive their cattle to the unexplored Kimberley. Makes our adventure seem a little tame! More scones at the Homestead – they might be top of the list – and then to the Lake for a sunset cruise.

On the cruise we just relaxed and enjoyed this massive expanse of water and the lovely islands, saw rock wallabies, more freshies, got spat at by Archer fish (sounds weird but it's hilarious!), and all got into the water as the sun started to set; a noodle, a glass of fizz and a tray of nibbles. Grins all round!

Day 7

My dream destination saved to the end of our week – Mitchell Falls! What can I say... it was better than I'd hoped. We loved the flight over the northern coastline to get there, and the commentary from the pilot was so good. Landing at the little airstrip and then walking up to the Falls was a huge adventure on its own, walking behind little waterfalls, stopping to wonder at the stunning rock art, learning about the plants and trees, and then wading across the plateau at the top of the Falls, even having a nice dip before lunch. Seeing the Mitchell Falls cascading down from one pool to another is so perfect, and then we all got to fly in a helicopter, over the Falls and back to the plane. I'd never been in a chopper before and it was such a treat, I didn't want it to end.

We treated ourselves to a night in one of the town's lovely hotels, shook the dust off, did some washing, cooked for ourselves and slept in a king-sized bed for the first time in a while!

A week was barely enough for our time here in Kununurra – we want to come back again with our kids and grandkids. We want to go fishing for barramundi, walk amongst the Bungles, go further along the Gibb River Road and up to Kalumburu. It's been the best trip of our lives.

TRAVEL TIPS

@outbackoverlandoz

Travel Smart

You can never be too prepared, especially in the rugged East Kimberley. Protection from the sun lessens the possibility of sunburn and dehydration. It is advisable to wear the appropriate clothing, hat and sunscreen and always drink plenty of water. Mosquitoes can carry Ross River virus and Encephalitis. Covering up and using an insect repellent will minimise the risk of these bites. When camping, use a fly screened tent or mosquito net.

Driving

The East Kimberley can be unforgiving, if unprepared. It is advised you take the relevant precautions to keep you and your loved ones safe whilst on the road. Be aware that from dusk until dawn, many animals (wallabies, kangaroos, cattle, horses etc.) are more active and can stray onto the roads from unfenced farms. 4WD vehicles are recommended on all unsealed/gravel roads. Always check with local authorities for the current road conditions

before you depart. Take spare tyres, food and water. Road trains can be 50m long, please be cautious when looking to overtake them as it can take some time.

Bush Walking

It is advisable to always notify someone if you intend to undertake some bushwalking into more remote areas. Inform them of your departure time, destination and expected return time. Always carry sufficient water in case of any emergency.

Snakes

All snakes are protected species and should be left alone. Most snake bites occur when people disturb or try to touch them

Crocodiles

There are two main species of crocodiles found in the East Kimberley; the estuarine or saltwater crocodile (known as 'salties') and the Johnson freshwater crocodile (known as 'freshies').

Salties are extremely territorial animals; they are considered to be the most dangerous and can grow up to seven metres in length. However, all crocodiles are potentially dangerous. Always observe warning signs and if in doubt don't swim, canoe or use small boats in estuaries, tidal rivers and deep pools.

Fires

Please ensure all fires are confined to appropriate fireplaces, are extinguished upon departure and always remember – BUSHFIRES KILL!

Flood and Cyclones

Cyclone season is generally between November and April. Please listen carefully to any cyclone alerts provided on radio or television stations to keep yourself and your loved ones safe. Alerts in the region can be found via www.bom.gov.au or www.fesa.wa.gov.au.

Cane Toads

When handling cane toads make sure you use gloves or a plastic bag. In Kununurra, you can drop cane toads off at the Kimberley Vet Centre and DBCA Parks & Wildlife service office.

Quarantine Aware

Western Australia is free from many of the insect or animal pests, plant and animal diseases and weeds which are present elsewhere in Australia, therefore there are strict quarantine laws on what can be brought into WA. If you are unsure then declare it, there are large penalties in place for those caught. For more information please visit www.agric.wa.gov.au

Travelling during the Wet Season

The months of November through to April are commonly known as the Wet Season in the North West, bringing with it tropical cyclones and flooding, which can cause widespread damage, injury and loss of life.

Before you set off:

- Familiarise yourself with Cyclone Warning and Alert systems
- Check road conditions and obey the road closure signs
- Prepare an emergency kit – including a battery operated AM/FM radio
- Know the local ABC radio channel for all areas you plan to travel
- Tell someone about your travel plans

While travelling during the wet season:

- Check weather conditions on www.bom.gov.au
- Listen to ABC radio and follow advice from authorities
- Do not drive into water of unknown depth
- Do not park or camp in dry riverbeds

Government of **Western Australia**
Department of **Mines, Industry Regulation and Safety**

Seven Golden Rules for Prospecting

1. Put safety first

- Make sure you have enough water, fuel, maps and first aid supplies.
- Give serious consideration to taking some form of telecommunications and a global positioning system to fix locations, and a Personal Locator Beacon (PLB) – it may turn out to be your most important safety device.

2. Obtain a Miner's Right permit when prospecting on vacant Crown land.

3. Obtain a 40E permit prior to prospecting within an exploration tenement (if you don't have written permission from the tenement holder).

4. Get written permission from the tenement holder when prospecting on:

- a mining lease
- an exploration licence (if you don't have a 40E permit)
- a prospecting licence.

5. Comply with all legal requirements when prospecting on a pastoral lease. You cannot prospect within 100 metres of any occupied building or within 400 metres of any livestock watering point without the consent of the pastoralist.

6. Show respect when on Crown land because it is used by other people or set aside for many purposes.

7. Fill any holes that you dug and repair ground that has been disturbed.

DID YOU KNOW ... that the maximum penalty for an individual prospecting illegally is \$150,000?

- For more information about prospecting, please visit your nearest Mining Registrar's office to obtain a copy of *Prospecting in Western Australia* or download it from: www.dmp.wa.gov.au/prospectingwa
- To find your nearest Mining Registrar's office, please visit: www.dmp.wa.gov.au/regionaloffices

www.dmp.wa.gov.au/prospectingwa

Crocs are common | Crocs move around | Crocs are deadly

BE CROCWISE

FACT

Estuarine crocodiles can be found over 200km from the coast in freshwater habitats (rivers and billabongs).

FACT

An Estuarine Crocodile can attack in less than a second.

FACT

Estuarine Crocodiles are extremely sensitive to sound and vibrations, noise from a boat is likely to attract them.

For more information on 'Be Crocwise'

ORD RIVER IRRIGATION AREA (ORIA)

One of the most spectacular and important features of the East Kimberley is the Ord River Irrigation Area (ORIA).

Located in the East Kimberley region of Western Australia's far north ORIA was the product of a bold and imaginative plan to develop part of the nation's tropical north for intensive agriculture by harnessing the waters of the Ord River. The ORIA is the realisation of a dream held by Kimberley Durack, grandson of the famous Durack pioneers. He believed the rich soils of the river flats along the Ord would be ideal for an extensive irrigation scheme and was instrumental in establishing the first experimental plots in 1941. This led to the development of the Kimberley Research Station on Ivanhoe Plains in 1946.

The Kununurra area's unique agriculture and horticulture is unmatched by any other growing region in Australia. What sets it apart is an abundant supply of reasonably priced land and water and an excellent climate.

Since their discovery in the late 1870's by Alexander and John Forrest, the fertile alluvial plains of the lower reaches of the Ord River have lured pastoralists and farmers to the East Kimberley.

Around 25,000 hectares in size, the ORIA lies north and south of Kununurra with the dominant crops being melons, mangoes, pumpkins, sandalwood and seeds.

ORIA Calendar of Development

1879	Alexander Forrest, explorer, names Kimberley district and Ord River and makes a diary note related to the Ord area – “an extent of country equal to about 25 million acres has been opened up for pastoral and agricultural settlement”.
1884	First cattle arrive on Ord River
1886	Durack Family arrive with cattle following epic droving trip from Queensland
1928	Frank Wise, agricultural advisor, visits area
1941	First experimental irrigation plots
1946	Kimberley Research Station developed
1962	First farmer settlers arrive
1963	Diversion Dam construction completed
1972	Lake Argyle Dam completed
1974	Dominant crop of cotton ceases production
1974-80	Diversification into sorghum, peanuts and rice
1985	Research Station renamed Frank Wise RS
1987	Trial plots of sandalwood established
1990-06	Dominant crops are sugar, mangoes, melons and pumpkins
1996	First commercial sandalwood crops established
2007	Sugar cane production ceases
2007	Dominant crop is sandalwood
2008	Hemp trial
2009-10	Cotton, rice and wheat trials. One of the largest producers of Chia in Australia
2001-12	Ord Stage 2 in full development
2013	Ord Stage 2 completed. Lease granted to Kimberley Agricultural Investments KAI
2014	First crop planted (Chia) by KAI on the new Goomig farm lands
2017	KAI acquires the Carlton Hill and Ivanhoe pastoral leases and freehold
2018	An extensive 3 year trial of late wet season cotton comes to an end

ORIA Facts

- Agricultural returns approximately \$100 million per annum to the area
- The Ord River Irrigation Area is currently made up of the following farm districts:
- Ivanhoe Valley - 15,000 ha (known as Ord Stage 1)
- Goomig - 7,400ha (known locally as part of Ord Stage 2)
- Packsaddle Plain - 3,000ha (mixed farming)

Today, ORIA successfully produces the following:

- Our most widely grown crop is Indian sandalwood. We also grow seeds and pulses, maize, chickpeas, borlotti beans, sorghum, hybrid bird seed and sunflowers.
- Rock melon and watermelon.
- Citrus fruits such as lime and grapefruit.
- Mangoes, bananas, paw paw and other exotic tropical fruits. Harvested vegetables include squash, zucchini, pumpkin, corn and green beans.
- Trial crops such as cotton, rice, wheat, sugar cane and soybeans have also been planted at different stages.

ARGYLE HOMESTEAD MUSEUM

Argyle Downs Station was established in 1886 when Patrick (Patsy) Durack sent his eldest sons Michael Patrick (MP) and John Wallace (JW) from Queensland to set up the station.

Patsy Durack arrived in 1887 to help his sons and his wife Mary arrived in 1889 after a financial disaster left his Queensland interests in ruin. Mary died at Argyle from malaria on 24th January 1893.

Grieving over the loss of his wife, Patsy built a new homestead from handcrafted limestone blocks with crushed termite mounds as mortar and wide verandas paved with flat riverbed stones. This was a magnificent building for its time. Patsy Durack died on 24th January 1898, exactly 5 years to the day after his beloved wife.

In 1969 it was suggested that the fine, old, historically significant homestead should be preserved for posterity before the waters backing up behind the Ord Dam to form Lake Argyle inundated the property. Work began on dismantling the homestead for storage prior to reconstruction and it was estimated it would take two wet seasons from the completion of the dam to submerge the vacant homestead.

Unexpected heavy rain caught everyone by surprise and by January 1972 much of the valley was submerged. While much of value at the original site had to be abandoned to the waters, the Homestead building as well as gravestones and plaques were rescued.

The stones taken from the old homestead were numbered for reassembly in its original position and remained in storage in Kununurra awaiting funding. A grant for \$98,330 was received from the Federal Government and \$30,000 from the WA Government. Reconstruction work began 16kms from the original site on a hilltop above the shores of Lake Argyle.

The museum homestead is estimated to be about 85% true to the original building with its wide verandas and doors on opposite sides allowing cool breezes to blow through from any direction, and a gun barrel hallway which funnels air through.

The Argyle Homestead Museum was officially opened on the 23rd of June 1979 and the key to the front door presented to Dame Mary Durack, granddaughter of Patsy and Mary.

Treasured items have been donated to the museum by Durack family members, and period furniture, articles, equipment and photographs have been gathered and assembled for display.

The Argyle Homestead Museum is managed by the Kununurra Visitor Centre with caretakers in residence from April to September. A small fee is payable upon entry during April to September to help maintain this legacy to Patrick Durack and his family.

The book 'The Duracks of Argyle' written by Dame Mary Durack's daughter Patsy Millett is available exclusively at the Argyle Homestead Museum and the Kununurra Visitor Centre.

KUNUNURRA & WYNDHAM

VIEW OF KELLY'S KNOB FROM MIRIMA NATIONAL PARK, KUNUNURRA. @visitkununurra

Kununurra

Kununurra is a relatively new town that was established in 1961 as a service centre for the Ord River Irrigation scheme after the success of the first stage and lots of investment. The name Kununurra comes from the Miriuwung word 'Goonoonoorang', which translates to 'meeting of big waters'.

Initially, Kununurra sustained a population of 400 people. Today, Kununurra has a transient population that ranges from around 7,000 to more than 14,000 during the dry season. This number is set to increase as the area becomes more important with further investment into the Ord River Irrigation Area.

Agriculture is one of the biggest industries in Kununurra.

Tourism is, unsurprisingly, a major employer for the town and region, with visitors coming from around the world to see the wonders of 'Australia's last frontier'. Whether arriving by plane, car, coach or bike the Kimberley creates lifelong memories for all.

Wyndham

Wyndham was gazetted in 1886, to service the Halls Creek gold fields and the outlying cattle stations. Its northerly position in the state means it is known geographically and affectionately as the 'Top Town of the West'.

Wyndham Port was established in the 1880s and is still a busy departure point for ships carrying cattle, minerals and agricultural produce. Many tourist cruise ships also stop here during their trips along the stunning northern coastline of Western Australia and the Northern Territory.

Wyndham's three cemeteries bear testimony to those early settlers of the 19th century, including Afghan cameleers and gold miners. The establishment of a meatworks in Wyndham in 1919 was a major employer for the region, until its closure in 1985. The rich Aboriginal history of the area, survival stories of explorers and the shock attack by 8 Japanese aircraft during World War 2 can all be learned about at the excellent Historical Society.

See page 25 for some of Wyndham's other highlights, including what many believe to be the 'best lookout in Australia'.

EXPLORE

KELLY'S KNOB LOOKOUT. @kununurrapixels

Wyndham and Kununurra are packed full of unique places to visit and things to do. Whether you're interested in the history of the region, our agricultural area, walking trails, wildlife, beautiful lookouts or a freshwater spring to relax in, there really is something for everyone! With so much to see and do in the Kununurra area, it's easy to see that a week is not long enough. If you stop into the Kununurra Visitor Centre you can grab a map outlining points of interest, and perhaps even a local secret or two...

KUNUNURRA

Kelly's Knob Lookout

Great place to catch an East Kimberley sunset, just a short drive from the centre, gives you scenic views over the town and valley.

Picture Gardens (May-Nov only)

Have a night out at the best outdoor picture theatre in the west. Located on Coolibah Drive, it's a memorable way to go to the movies.

"GET UP THERE
AT AROUND 4.30PM
TO ENJOY THE SUNSETS
- REMEMBER THE SUN
GOES DOWN EARLY HERE,
AROUND 5PM!"
- DENISE

Kununurra Museum

Run by volunteers, the Historical Society is a must see for those interested in the region's Aboriginal and settler history, with many artefacts and photos on display.

Celebrity Tree Park/ Lily Creek Lagoon

Celebrity Tree Park was opened in 1984 and displays a variety of tree species planted by famous visitors to town. Wander around and spot such famous names as John Farnham, Kate Ceberano, HRH Princess Anne, Richard Clapton and Baz Luhrmann, just to name a few. Follow the boat ramp to reach picturesque Lily Creek Lagoon. For the avid wildlife watcher, the lagoon is home to freshwater crocodiles and a myriad of birdlife.

Swim Beach

Located on the banks of Lake Kununurra, Swim Beach is a popular spot for locals and visitors to enjoy a BBQ, take a walk and go for a swim. Dogs are also allowed.

Mirima National Park

Also known as Hidden Valley or the mini Bungle Bungles, Mirima boasts fascinating rock formations that have taken shape over the past 350 million years. The park is home to three small walking trails, and plenty of local flora and fauna.

DIVERSION DAM. @kununurrapixels

Diversion Dam

The Dam was the first stage in the construction of the Ord Irrigation Scheme and was completed in 1963. The Diversion Dam comprises 20 radial gates that are raised or lowered to regulate the water level of Lake Kununurra, primarily to maintain water flow to the irrigation area and also to manage wet season flood levels. The dam crosses over the Victoria Highway. For the best view of the dam, pull into Lions Park Picnic Area. It's a great place to take a few photos, launch your boat or just have a picnic. Please be crocodile aware and definitely NO SWIMMING.

Elephant Rock/Sleeping Buddha

This large rock formation is located just out of Kununurra and is named after 2 unique rock features. From one angle, at Celebrity Tree Park, it appears as a Buddha in repose and from a southern angle, an elephant head is definable.

Ivanhoe Crossing

This concrete causeway was constructed as part of the original road from Wyndham to Katherine in the NT. Due to varying water levels, please check with Kununurra Visitor Centre or Shire of Wyndham East Kimberley on road closures. Fishing is a favourite pastime around the Crossing but please be crocodile aware and definitely NO SWIMMING.

TO WYNDHAM VIA THE GREAT NORTHERN HIGHWAY

Valentine Spring, Middle Spring and Black Rock Falls (4WD only)

During early post wet season, these areas show off spectacular waterfalls and cool waterholes. Accessible via Parry Creek Road.

Ngamoowalem Conservation Park/ Molly Spring (4WD only)

Molly Spring can be accessed via the Victoria Highway, 30km west of Kununurra. The track is unsealed but can generally be accessed year-round by 4WD.

Cockburn Range

This impressive range is the most prominent landform viewed on the Gibb River Road between the Great Northern Highway and the Pentecost River. This extensive sandstone escarpment rises over 600m above the surrounding plains.

The Grotto

Located just 2km off the Great Northern Highway, this delightful swimming hole lies at the base of 140 steps. The Grotto forms a natural amphitheatre and is a spectacular waterfall during the wet season rains.

GREAT PHOTO OP
HERE AS THE RIVER
FLOWS OVER THE ROAD...
ORDSOME!
- DENISE

"TAKE A PAIR OF
BINOCULARS WITH
YOU AND SIT QUIETLY
FOR A WHILE; THERE'S
SO MUCH BIRDLIFE IN
THE LAGOON."
MICHAEL

PAPERBARK FLYCATCHER, PARRY LAGOONS NATURE RESERVE. @dick_at_jenkinphotography_

TO WYNDHAM VIA PARRY CREEK ROAD (4WD ONLY)

This old road to Wyndham (approx. 100kms) takes you through some spectacular country, ranges and savannah lands. The back road to Wyndham, as locals know it, follows the Lower Ord River part of the way offering easy access into parts of the river for fishing and camping.

Mambi Island Boat ramp

Located along Parry Creek Road, Mambi Island Boat ramp provides access to the Lower Ord River. Saltwater crocodiles present in this area.

Old Halls Creek Road

Built about 1894 to provide access for those travelling from Wyndham to Halls Creek following the discovery of gold in 1885. The road features hand laid pavement stones that can still be seen today.

Parry Lagoons Nature Reserve

RAMSAR Nature reserve that includes Marlgu Billabong. Caution Saltwater Crocodiles are found in this area.

Telegraph Hill

Located off the Parry Creek Road, this vantage point provides wide vistas of the flood plains and distant ranges. Take time to explore the ruins of the old Telegraph Station built in 1914,

which assisted shipping activities using the Wyndham Port during World War I. A shaded picnic area was installed in 2019.

Marlgu Billabong

A boardwalk and shaded bird hide have been constructed over a billabong within the Parry Lagoon Nature Reserve. A birdwatcher's paradise but be aware of Saltwater crocodiles in this area.

King River Road (4WD only)

Commencing just south of Wyndham the King River Road ends at the Karunjie Track.

Moochalabra Dam (4WD only)

This dam was constructed in 1971 to provide the Wyndham area with a water supply. The spillway forms a spectacular waterfall during the wet season.

Aboriginal Rock Art Paintings (4WD only)

Located close to Moochalabra Dam, these rock paintings show Wandjina Spirit ancestors and animals, all painted in natural ochres.

Prison Tree (4WD only)

This great example of a Kimberley Boab is near the King River Road. It was used by the early police patrols as an overnight lockup.

FIVE RIVERS LOOKOUT, BASTION RANGES. @visitkununurra

WYNDHAM

Crocodile Statue

This 20-metre-long statue is the first introduction and welcome to visitors to the town. Its construction includes 5.5 kilometres of steel rods, 50kg of welding rods, 10 rolls of bird wire and 5 cubic metres of concrete.

Five Rivers Lookout/ Bastion Ranges

At 330 metres above sea level the Daharwi Range or Bastion Range provides a spectacular backdrop to Wyndham. Identify the five rivers that flow into the Cambridge Gulf (King, Ord, Durack, Forrest and Pentecost) or just take in the stunning views over the surrounding mudflats and ranges. A great place to catch a Kimberley sunset.

Three Mile Valley Walking Trail

Located at the base of the Bastion Range are the 2 walk trails of Three Mile Valley. One follows the Three Mile Valley Creek and the other heads past the Bastion Ranges for some spectacular views of the surrounding landscape.

Wyndham Port

Founded in 1885 the historic port area still plays an integral part in the pastoral, mining and tourism industries. Historic buildings still stand as testament to the early days of Wyndham Port including the Wyndham Museum. As the wharf is a working area, public access is denied onto the wharf and its surrounds.

Wyndham Community Recreational Fishing Jetty

Opened in 2012, the new jetty is a publicly accessible all-tides jetty that provides unrestricted access for locals, visitors and small craft wishing to engage in recreational fishing.

"THROW A LINE
IN HERE AND ENJOY
THE VIEW WHILE YOU
WAIT FOR THE BIG ONE
TO BITE!"
- MICHAEL

Wyndham Museum

Located in the old Courthouse building in the port area, it contains fascinating memorabilia, journal records and photographic displays of Wyndham throughout its colourful past.

Anthons Landing

Site of the original wharf built in the 1880's. The wharf remains can still be seen at a low tide.

SLEEP

The East Kimberley offers a great range of accommodation to suit all types of visitors and at very different price points. Options span across the whole area from Kununurra at the heart, to the port town of Wyndham, the magnificent unique retreats on the coast of the Timor Sea and into the expanse of the outback including the Gibb River Road, Purnululu, Mitchell Plateau and last but not least, Lake Argyle.

EMMA GORGE RESORT, EL QUESTRO WILDERNESS PARK. *Tourism Western Australia*

Camping/Caravan Parks

The East Kimberley is a great place to experience camping out under the stars. The dry season days are cooler and allow for fantastic walks into some spectacular country, and the nights are just made for a good night's sleep out in the bush. Pack up the swag and get out into the vast Kimberley, it's just begging to be explored.

The following information is provided to advise travellers of a few good camping out tips on how to make your overnight stay in the bush more enjoyable, not only for you, but for the next visitor also:

- Respect private property and Aboriginal land – seek permission before entering or camping and leave gates as you found them.
- Remember, all land belongs to someone.
- Observe fire restrictions and take care with fire at all times. Campfires can only be lit in designated fireplaces and it is advisable to use fuel type stoves where possible. All fires should be fully extinguished prior to leaving the site.
- Avoid contaminating creeks and waterways with soaps and sunscreens.
- Admire and photograph plants and animals but leave them to themselves.

- Please dispose of your litter and rubbish – where there are not rubbish bins, take your rubbish with you.
- Show consideration for fellow campers, please bury all human waste and toilet paper deeply.
- Help prevent the spread of weeds by removing prickles and burrs from clothing, pets and camping gear and disposing of them appropriately.
- Please endeavour to make the least amount of impact on the area in which you camp. The cutting down of any trees is prohibited.
- Camping within 20km of a town within the Shire of Wyndham-East Kimberley, if caught will result in \$200 on the spot fine. Please be aware Shire Ranges patrol the area daily.

Hotels/Resorts

If you are travelling by car or plane or looking for a more luxurious stay, there are three and four star accommodation providers offering you a real 'home-away from-home' experience, and a chance to really spoil yourselves in the heart of the Kimberley.

For a better understanding of where the accommodation providers are, please refer to the map later in the guide. For a full list of accommodation providers please visit our website visitkununurra.com or come and see us when you get to town.

EXPERIENCE THE EAST KIMBERLEY

Where do we start?!? We really are blessed with some unique, beautiful and memorable places and experiences. We love the water round here, we love the landscapes, we love our remote wide skies, the art, the diamonds and our Miriung Gajerrong culture. It's tough to narrow it down, but here we go...

ORD RIVER GORGE LOOKOUT, LAKE ARGYLE. @charlottefisherr

WARINGARRI ABORIGINAL ARTS CENTRE, KUNUNURRA. *Tourism Western Australia*

ART & CULTURE

Cultural experiences are growing in the region, with tours regularly run by local Aboriginal guides. Miriuwung, Gajirrawoong and Gija are the main Aboriginal language groups in the area. The Mirima Dawang Woorlab-Gerring Language and Culture Centre organises cultural dances for annual festivals and the Ord Valley Muster regularly hosts the Mirima Dancers to share their culture with the local community. Contact Kununurra Visitor Centre to get an update on tours available throughout the region including tag-along tours.

Kimberley Aboriginal People

"Aboriginal people are connected to the land through our culture, law and dreaming. We have a responsibility to look after our land, just as it looks after us. Our country connects our people to the past, present and future" – Kevin George – Bardi Jawi Cultural Ranger.

Kimberley Aboriginal people are part of the oldest continuous culture in the world, dating back more than 50,000 years.

The cultural values and traditions of Kimberley Aboriginal people are vibrant and strong. They are embedded in the land through stories about the creation of country often referred to by non-Aboriginal people as the 'Dreaming'.

The Kimberley is a living landscape and the relationship between Aboriginal people and country is one of mutual respect and benefit.

Renowned for its vibrant colours, remarkable landscape and unique biodiversity, the

Kimberley is home to some of Australia's priority biodiversity hotspots. It is also of outstanding importance to the nation and as such has been National Heritage Listed for its Indigenous cultural and natural values. The Indigenous nation has played an instrumental role in preserving, managing and enhancing the natural living environment.

The Kimberley is a significant Aboriginal place that holds an energy found nowhere else in the world.

Kimberley Ranger Network

The Kimberley Ranger Network is facilitated by the Kimberley Land Council (KLC) and supported by the Australian Government. It works to realise Indigenous aspirations to look after country while providing real jobs, training and education, as well as improving socioeconomic standards and community wellbeing.

ABORIGINAL ROCK ART. *Tourism Western Australia*

The Kimberley Ranger Network is a grass-roots initiative that encourages nation building, as elders work with rangers and young people to pass on traditional knowledge of looking after country while enhancing law, language and culture.

Kimberley Aboriginal people have declared a corridor of Indigenous Protected Areas – highly sensitive areas with important biodiversity values across the coast and deep into the heart of the Kimberley. The corridor is one of the largest Indigenous conservation areas in Australia and is providing opportunities to create ecosystem based business enterprises while protecting culture. The KLC facilitates 14 ranger groups that employ more than 100 Aboriginal rangers, elders and associated staff who look after land and sea country. Ranger activities can include fire management, feral species monitoring and eradication, research, water monitoring, rock art and cultural heritage management, climate change strategies, coastal monitoring and biodiversity surveys.

The Kimberley Ranger Network is not only achieving environmental success but generates positive social benefits that are far and wide reaching. The Kimberley is a big place, but you might just see the rangers in your travels. Make sure you keep an eye out and say hello.

Kimberley Rock Art

“Rock Art is like our library in the bush. When we find painted fingerprints and footprints, it tells us who the people were for that country. A painting of animals tells you what food you can find there. Paintings can warn us of danger too”
– Jason Adams, Unguu Ranger

The dynamic rock art of the Kimberley provides an amazing visual insight into ancient Aboriginal culture. The region is famous for its Wandjina and Gwion Gwion (Bradshaw) rock art that depicts spirit figures that have been painted on rocks and caves across the north Kimberley.

Rock art in the Kimberley is part of a dynamic, living culture that connects people, country and everything within it.

All rock art sites are protected under law and it is an offence to damage or interfere with any art sites. Kimberley Aboriginal people hope you enjoy the magic of the Kimberley but ask that you respect cultural places and rock art sites and follow all signs outlining where it is safe and not safe to visit.

WARINGARRI ABORIGINAL ARTS CENTRE, KUNUNURRA. *Tourism Western Australia*

ART AT THE HEART

The East Kimberley is blessed with superb landscapes and dramatic weather, as well as thousands of years of Aboriginal history. Many artists have lived or chosen to base themselves here, and interpreted this wonderful region into their artworks, sculptures, photography, jewellery, ceramics and more. Art really is at the heart of the Kimberley.

Spend time in Kununurra's 3 beautiful art galleries, Artlandish, Waringarri Arts and Artopia, which have permanent displays as well as new exhibitions featuring locally based and internationally renowned artists. From Aboriginal paintings of the Wandjina dream spirits, to contemporary landscapes painted with real gold and diamonds, paintings of wildlife so accurate you would swear they are photographs and the chance to see some of our Aboriginal artists at work, this is a day out in itself for the art lover.

Looking for other memories of the Kimberley? Try Birdland, Penney's Prints, Walkabout Souvenirs and the Chikshed for unique and delightful handmade pottery, jewellery, photography as well as cards, candles and other gifts.

Of course, the Pink Diamond is a stunning sight on its own, but Kununurra's two jewellers, Kimberley Fine Diamonds and Nina's, have created truly stunning pieces featuring the diamonds, as well as gold, silver and other

materials. It costs nothing to browse and the staff here will be happy to show you some of the region's gems. With the Diamond Mine closing in 2020 it might be a good investment!

Have you heard of Zebra Rock? Only found within a small radius of Kununurra, this rock naturally forms in beautiful bands that explain the name. Visit our town's 2 galleries; Kimberley Ornamental Stonecraft and Rockalong, to see the stunning jewellery and ornaments made from this unique Kimberley stone.

Pop into the Visitor Centre for a local map to help you find your way to these beautiful places.

If you're heading down south, then Warmun's world famous art gallery is a must-see for artworks of the Gija people.

Jeanne Barnes Artist

Paintings in watercolour, oil, acrylic, gouache, and gold leaf inspired by the Kimberley.

By appointment only 0458 467 924

Kimberley Ornamental Stone Craft

Located on Riverfarm Road – unique Kimberley zebra stone hand crafted by local and international artists. Browse the gallery and take a look at the workshop, where they work the Zebra stone.

Kimberley Fine Diamonds

Located on Konkerberry Drive, a selection of fine art and gifts in store, hand crafted jewellery using Argyle Pink Diamonds.

Nina's Jewellery

As one of very few ateliers of Argyle Pink Diamonds in the World, Nina's can show you a range of jewellery you won't find elsewhere.

Penney's Prints

Located in the Kununurra Visitor Centre, local photographer who offers a variety of Kimberley inspired merchandise, jewellery, candles and gifts.

Waringarri Arts

Located on Speargrass Road – Waringarri Aboriginal Arts is a wholly Aboriginal-owned art centre specialising in contemporary collectable Indigenous art of the East Kimberley region.

Birdland Functional Art

Located on Poinsettia Way – unique pottery, glass & jewellery made here in the Kimberley. Browse the gallery for a selection of handmade pieces on offer. Not to be missed.

Rockalong Stonework

Located on the corner of Bandicoot and Daniella Way - offering unique products. Handmade on site from local zebra rock and other Kimberley siltstones. A huge range to choose from.

Artopia

Located on Konkerberry Drive – original art created by local artists that capture the dramatic Kimberley region, jewellery, photography, unique gifts and more.

The ChikShed

Located on Jabiru Road – The Chikshed produces unique mosaic and textile handicrafts such as planters, mirrors, pottery and glass. A special gift for a special person.

Artlandish

Located on Papuana Street – specialises in current works and private collections from the Ochre Masters of the Kimberley, also offer a huge range of authentic boomerangs, boab nuts and more.

Walkabout Souvenirs

Found in the Coles shopping centre, Walkabout has a great range of unique boab, stone and leather gifts.

We have a large variety of Zebra Rock products and souvenirs, all made in our workshop. With such an array of colours, it is hard to believe that these rocks are a natural feature of the Kimberley.

ARGYLE DIAMOND MINE

Since mining began in 1983, this site in the remote East Kimberley has become the world's largest supplier of natural coloured diamonds, including the stunning and much desired pink diamond.

Located north of the Bungle Bungle National Park, the mine makes for a stunning landmark, whether seen by air or on a ground tour. This year is the last chance for the public to visit this remarkable location, as the mine will be closing in 2020.

Visitors can fly over the mine on a scenic flight, or land at the airstrip and see the operations firsthand. Or for a truly unique experience, hop on a coach trip guided by Aboriginal Traditional Owners and learn about the cultural significance of the area.

LAKE KUNUNURRA. © kununurrapixels

LAKE KUNUNURRA & LAKE ARGYLE

The Ord River was once the fastest flowing river in Australia. It was harnessed by the construction of two dams in 1963 and 1971 to develop the agricultural industry in the Ord Valley. The damming of the Ord created two of the most spectacular lakes in Australia - Lake Argyle and Lake Kununurra.

Lake Kununurra

You wouldn't want to visit Kununurra without taking a trip up the 55km stretch of river from Kununurra to Lake Argyle. This section of the Ord River is referred to as Lake Kununurra or the Upper Ord. Lake Kununurra is a man-made reservoir that was formed after the completion of the Diversion Dam in 1962. It harbours a large variety of flora and fauna, forms wetland areas, and provides a water frontage to Kununurra. As you wind upriver you will not be disappointed with the amount of wildlife on offer, including crocodiles, sea eagles, kingfishers, bats and more! At the end of the 55km stretch, the Ord Top Dam separates Lake Kununurra and Lake Argyle.

Lake Argyle

Located just 70km south of Kununurra lies Lake Argyle, the largest reservoir of fresh water in Australia and one of the most spectacular scenic locations in the East Kimberley. Lake Argyle was created by damming the Ord River (1973) and forms a storage reservoir for the Ord Irrigation area. The result is a massive expanse of freshwater equivalent to 19 Sydney harbours on average. Lake Argyle features many bays, inlets and islands and provides spectacular views either at water level or from the air.

LAKE ARGYLE. @visitkununurra

Lake Argyle is a unique ecosystem, home to an amazing array of wildlife including 25,000 freshwater crocodiles, 26 species of native fish, 90 islands which are home to various marsupials and reptiles and approximately one third of Australia's bird species which at times can number in the tens of thousands.

Lake Argyle is designated as a RAMSAR wetland of International Significance.

What to do:

There is an adventure for everyone on Lake Argyle and Lake Kununurra. You can experience an awe-inspiring scenic cruise on either of these lakes, which is one of the most popular attractions in Kununurra.

A cruise on Lake Kununurra will get you up to speed on the amazing scenery and wildlife, including freshwater crocodiles, eagles and the elusive kingfisher. For the more adventurous traveller, opt for a self-guided canoe of the lakes over 1, 2 or 3 days and marvel at the views and wildlife in your own time.

A cruise of Lake Argyle's shoreline and islands will give you close encounters with an incredible variety of native fauna, from freshwater crocodiles, fish and wallabies to more than 240 species of birds. The sunset cruises are particularly memorable, as you get into the beautiful soft water with a glass of fizz, and push trays of

nibbles between you and your fellow travellers while watching the sun set over the ranges.

Alternatively, take an evening in the slow lane and soak up a Kimberley sunset with the Lake Kununurra Sunset Cruise, the perfect way to enjoy great local food and relax after a day exploring the spectacular East Kimberley region. Scenic flights also operate between Kununurra and Lake Argyle, which will give you an unrivalled view of Lake Argyle.

Both Lake Argyle and Lake Kununurra are also great spots for keen anglers. Locals and visitors utilise the lakes as water-sports playgrounds, and calm weather makes both of these locations a water skier's dream! The Kununurra Ski Club also hosts a Dam to Dam dinghy race on Lake Kununurra every year.

If you'd like to learn more about Lake Kununurra or Lake Argyle, including information about tours and accommodation, get in touch with the Kununurra Visitor Centre.

MITCHELL FALLS

It may take some time and effort to reach this magnificent part of the East Kimberley, but when you do, it's definitely worth it! The Mitchell Falls are one of the most sought-after attractions in the Kimberley and rightly so. You need to see it to believe it!

There are several ways you can reach Mitchell Falls or Mitchell Plateau and enjoy the walks and wildlife in the surrounding area. You can take a scenic flight from either Drysdale Station or Kununurra or you can drive along the Gibb River Road yourself and stay in the campground or Wilderness Lodge. There is also a scenic flight operator located on the ground should you wish to take to the air!

If you're heading up to Mitchell Plateau you will need to purchase an Uunguu pass; available at the Kununurra Visitor Centre, Drysdale River Station or Munurru campground. For more information go to www.wunambalgaambera.org.au.

It is approximately 523kms from Kununurra to the Mitchell Falls Wilderness Lodge.

Wunambal Gaambera Country
NGAUWUDU & UUNGUU COAST, KIMBERLEY, WESTERN AUSTRALIA

THE BUNGLE BUNGLE RANGE

The Bungle Bungle Range is an astonishing formation of beehive-shaped sandstone domes, situated in Purnululu National Park, Purnululu is one of only 20 UNESCO listed World Heritage Sites in Australia.

Atmospheric, breathtaking and unforgettable, walk amongst the 250-metre-high domes and marvel at the changing colours of the rocks during the day. Long known by the Gija people of the East Kimberley, it wasn't 'discovered' by Europeans until 1983 when a film crew saw it from the air. A short flight from Kununurra, or a 300km drive (see 'access' section below) makes this jewel of the Kimberley easily accessible for today's visitors.

There are several walks within the park of varying length and difficulty, all of which are sure to delight. Choose to join up with a guide and really learn about how the land was used by the locals many years ago. You will learn about Aboriginal art, spinifex plants and their many uses, the intricacy of termite colonies and much more.

As well as enjoying the 360 million-year-old domes, things not to miss in Purnululu include Cathedral Gorge, a natural amphitheatre which amplifies every sound, Echidna Chasm with its winding path through two massive rock formations, stunning views over the Tanami desert and Piccaninny Creek, one of the longer but rewarding walks.

Purnululu deserves at least two days of your time, and there are a great range of options to spend the night, from caravanning, pitching a tent at the Parks and Wildlife campgrounds or for a taste of luxury, choose from the two resorts inside the Park. For those unable to drive in themselves, the Caravan Park at the Highway turnoff offers coach tours into the Park. Feeling adventurous? Book a helicopter flight to see this unique landscape from above.

For the best rates and to learn more about our fantastic tour operators for these East Kimberley icons then please visit our website www.visitkununurra.com

"BEFORE HEADING
DOWN THE GIBB RIVER
ROAD, DROP INTO THE
KUNUNURRA VISITOR CENTRE
AND PURCHASE THE GIBB RIVER
AND KALUMBURU ROADS
TRAVELLERS GUIDE AND THE
HEMA KIMBERLEY MAP."
- MICHAEL

THE GIBB RIVER ROAD

The 686km long Gibb River Road stretches from Kununurra in the east to Derby in the west. This iconic 4wd road was originally used to transport cattle around the remote stations of the Kimberley. Now the beauty and rugged outback adventures that can be found along the route have been recognised and are enjoyed by thousands of tourists each year. Remote camping, billion-star nights, high end accommodation, best-in-the-world waterfalls and gorges, live music and scones are just some of the highlights along the way. Be prepared, take your time and tick it off the bucket list, the Gibb is the stuff of legend!

Your Self-drive Adventure

The following advice is designed to assist in the planning of your self-drive adventure along the Gibb River Road and for those intending to travel onto Kalumburu.

All trips in the Kimberley are dependent upon road conditions and the Kununurra Visitor Centre can advise of up-to-date road reports. The information presented here is recommended for trips planned between May and October. Check out our Facebook Page for up to date information about the Gibb River Road.

A high clearance 4WD is strongly recommended for those intending to travel the Gibb River and Kalumburu Roads, and consideration must be made if intending to tow any form of trailer or caravan. It is recommended that any trailer or caravan be specifically designed and built with major off-road structural capabilities.

Along the Gibb, camping is restricted to designated camp sites. However, there are a number of stations that offer comfortable accommodation options. The lighting of fires is only allowed in designated fireplaces, and all rubbish should be disposed of in the rubbish bins if available, otherwise you are required to take your rubbish with you.

Please note that pets are not permitted in National Parks and please seek permission before taking them onto private property.

Accommodation

- El Questro (100km from Kununurra)
- Home Valley Station (115km from Kununurra)
- Ellenbrae Station (230km from Kununurra)
- Drysdale River Station (353km from Kununurra on the Kalumburu Road)
- Mt Elizabeth Station (390km from Kununurra)
- Charnley River Station (494km from Kununurra)
- Mornington Wilderness Sanctuary (546km from Kununurra)

- Mt Hart Wilderness Lodge (565km from Kununurra)
- Birdwood Downs Station (689km from Kununurra)

Safety

- Carry sufficient drinking water
- Carry at least 20 litres of extra fuel
- Carry two spare wheels or a full tyre repair kit
- Carry a selection of vehicle spares, i.e. fan belt, fuel filter, radiator hoses etc.
- Before heading off into any remote region, inform family and friends of your intended departure and arrival times
- Drive to road conditions at a safe comfortable speed
- Be crocodile aware at all waterways
- Allow sufficient time to explore the region in order to ensure an enjoyable Gibb River Road experience.

honeymoonbaywa@gmail.com

KALUMBURU MISSION. @visitkununurra

SURROUNDING REGIONS

Warmun (Turkey Creek)

Warmun is an Aboriginal community approximately 200km from Kununurra along the Great Northern Highway. The world renowned Warmun Art Centre is located in the community and is open to visitors. The community has limited facilities but is well served by the Turkey Creek Roadhouse for fuel, supplies and accommodation or as a base from which to visit the Purnululu National Park.

Kalumburu

For the adventurer seeking 'the road less travelled', the community of Kalumburu is a prized Kimberley destination. The turnoff to Kalumburu is 241km along the Gibb River Road from the eastern side. After that you have 267km of unsealed road before you reach the community. A warm welcome awaits, and the chance to explore the Catholic mission, the museum, and to pick up supplies at the store. Kalumburu is a dry community, a few kilometres from the spectacular northern Kimberley coastline. Two campsites on the coast give breathtaking views and unrivalled fishing opportunities. You will need two permits to

access Kalumburu, one through a paper permit and one on arrival at the community store.

Call the Visitor Centre for more information on this area, steeped in Aboriginal history and rock art, and to find out how to arrive in style by plane.

Halls Creek

Be sure to spend time in this little town with a 'heart of gold'.

Halls Creek has a very strong Aboriginal, pastoral and gold mining history. Public artworks commemorate and tell the remarkable stories of Aboriginal elder Jack Jugarie and gold miner Russian Jack. For some stunning views, especially at dawn and dusk, head down Roberta Avenue to the lookout.

Spend time in the town's art gallery, have fun shopping at the Visitor Centre, and don't miss your chance to send a postcard from the world's only Car Bonnet Post Box!

Just out of town, take a detour down the Duncan Road and marvel at China Wall, a natural vein of white quartz that rises up to 6 metres in height. Go a little further to explore the remains of Old Halls Creek, the original settlement when gold was discovered here in the 1880s. Just south of Halls Creek is the Tanami Road, which leads 4WD adventurers 150km to the awe-inspiring Wolfe Creek Crater.

THE FITZROY RIVER, FITZROY CROSSING. *Tourism Western Australia*

Derby

Hitting the Gibb? Whether you are starting or ending your Gibb River Road adventure, Derby is a memorable town, located on an ancient sand dune on the edge of the King Sound. There's a good range of accommodation options and plenty to see.

Derby has the highest tides of any Australian port, with an astonishing 11 metre range. Little wonder it is the closest departure point to the world-famous Horizontal Falls, as well as the beautiful Buccaneer Archipelago.

Superb art galleries, a unique curved jetty, boabs everywhere you look, mud crabbing and fishing, and a laid-back feel make Derby a classic Kimberley destination.

Fitzroy Crossing

The name says it all! As you make your way along the Great Northern Highway you cross the mighty Fitzroy River and get a stunning view of the water below. The region is home to Bunuba, Gooniyandi, Walmajarri, Nyikina and Wangkatjunka people and was settled by Europeans in the 1880s. Fitzroy Crossing is a well provisioned little town with a population of around 1,200. It's the perfect base to explore some of the region's highlights, including Geike Gorge, Mimbi Caves and of course Windjana Gorge and Tunnel Creek.

The NT

Great places to spend a day or more in the Northern Territory are the Keep River National Park and the Gregory National Park or try a bit of Barra fishing on the Victoria River, all within a couple of hours drive from Kununurra.

Fuel is available at Timber Creek and at the Victoria River Roadhouse. Katherine is 526km from Kununurra and is about 5-6 hours travel time.

If you are travelling north to Darwin allow yourself approximately 3-4 hours for the drive from Katherine. Better still, take your time and experience all the region has to offer from the world heritage listed Kakadu National Park, the old gold mining town of Pine Creek, the Douglas Daly region, Adelaide River Township and Litchfield Park.

The city of Darwin having survived the bombings of World War II and Cyclone Tracy in 1974 is today a modern city that boasts all the services and facilities required of a population of around 120,000 people. With an international and domestic airport and a national rail link, Darwin offers wide and varied accommodation and tour options with easy access to the iconic Territory destinations.

FISHING

When it comes to recreational fishing, the vast coastline of the East Kimberley with its many rivers and estuaries, provides a valuable habitat that is home to an incredible fisher resource.

Just one of the target species is the fabled Barramundi; 'catching a Barra' is what many visitors to our region dream of. To ensure the sustainability of fish stocks please remember the following:

- Barramundi have a legal-size limit between 55-80cm throughout Western Australia
- There is a state-wide bag limit of 2 barramundi and an overall possession limit of 2 barramundi per angler
- All barramundi start life as male fish and depending upon habitat and food source change to female fish at about 80cm
- Barramundi may only be caught by means of a rod and reel or hand line
- When handling your catch always cradle the fish with wet hands under the belly. Don't hold a fish by the lower jaw and always support the fish's weight
- When measuring fish lay them on a wet smooth surface

The tidal waterways are also home to the highly sought-after mud crab, a delicacy on anyone's plate. Two types of 'muddies' are

found in the region, the Green Mud Crab and the Brown Mud Crab. Size, bag and capture restrictions apply.

Please be aware that bag and size limits apply to most target species for offshore fishing along our coastline. For more information visit www.fish.wa.gov.au

- A recreational license is required if using a throw net and fishing from a boat
- Treat all fish humanely
- Abide by all fishing regulations
- Use only legally approved tackle
- Bring all your rubbish home
- Fish for the future

Did you know?

Barramundi have been recorded up to 150cm long and with weights in excess of 40kg, are thought to live up to around 20 years of age. Large females can produce 32 million eggs in a season.

NATIONAL PARKS

Many of the natural attractions of the East Kimberley are managed as National Parks or Nature Reserves. The Department of Biodiversity, Conservation and Attractions has the responsibility of managing WA's National Parks, Conservation Parks, Marine Parks, and Nature Reserves. Walk trails and camping areas are provided in most parks. For your safety please stay on marked trails and only camp in dedicated camp sites. Please also be advised that no pets are permitted within National Parks in the Kimberley Region

In the Kimberley, visitor fees and camping fees may apply – these are listed below:

Park	Entry Fee	Camping Fee
Mirima	Yes	No Camping
Purnululu	Yes	Yes (online booking only)
Mitchell River	Yes	Yes
Windjana Gorge	Yes	Yes
Tunnel Creek	Yes	No Camping
Bell Creek and Silent Grove	No	Yes
Parry Lagoons Nature Reserve	No	No Camping
Wolfe Creek	Yes	No
Ngamoowalem	No	No Camping

All current National Parks fee rates are available at the Kununurra Visitor Centre along with Holiday and Season Park passes. If you intend to visit numerous National Parks while in WA these passes will save you time and money.

For all your WA National Parks info contact the Kununurra Visitor Centre.

Mirima National Park

Located just minutes from Kununurra, Mirima was declared a National Park in 1982 to conserve the natural features and the associated local Miriung people's sites.

Mirima is a small park with sandstone ranges, cliffs and valleys, similar in appearance to parts of the Bungle Bungle Range. The park features 350 million year old sandstone, subject to some striking colour changes due to sunlight variances, and the region is known for its spectacular photo opportunities.

Mirima is the name given to the area by the local Miriung people and retains many sites of cultural significance.

Access

Access is via a sealed bitumen road.

Mirima Facilities

An entry fee applies and facilities include an information shelter, BBQ picnic area, tables, toilet and car park.

Camping or fires are not permitted at any time within Mirima National Park.

Walks

Four walk trails are available within Mirima.

The "Derbde-gerring Banan" or "Lookout Walk" takes you to the top of the range and provides spectacular views over the Ord Valley and surrounding sandstone ranges. This 800m return walk is a Class 4 – moderate to difficult.

The "Looking at Plants" walk is a 400m return loop walk that includes a universal access boardwalk and trailside signage to help you get to know some of the local plants and their traditional uses.

The "Demboong Banan" or 'gap trail' is 500m return and rewards you with a spectacular view of Kununurra through a gap in the eroded sandstone.

The "Gerliwany-gerring Banan" walk is a trail that traverses savannah woodland from the entrance right into the heart of Hidden Valley where the car park is situated. This walk is a moderate, 2.2km return walk.

Ngamoowalem Conservation Park

Ngamoowalem Conservation Park is one of the six conservation parks jointly managed between the Department of Biodiversity, Conservation and Attractions and the Miriwung and Gajerrong people. Ngamoowalem has five sites that can be visited; Molly Spring, Valentine Spring, Middle Spring, Black Rock Falls and Spring Creek track.

Molly Spring has a permanent pool, and in the wet season the rain creates stunning waterfalls at all the sites. The water flows off the Livistonia Range, which runs through the middle of the park. This unique range is home to a diverse range of plants including the cycad and fan palm. There are many sites of cultural significance in the conservation park.

Access

Molly Spring can be accessed from Victoria Hwy 30km west of Kununurra; the track is gravel but can be accessed by 2WD vehicles in the dry season. Valentines, Middle and Black Rock are all located off Valentine Spring Rd which comes off Victoria Hwy, 14km west of Kununurra. Valentine Spring Rd is gravel, corrugated and in the wet season floods, care must always be taken at creek crossings.

Entrances to Middle and Black Rock are four wheel drive access only, the tracks are prone to flooding and require high clearance.

Facilities

There are picnic facilities provided at Middle, Spring Creek track and Black Rock, and no facilities at Valentines. Please take your rubbish with you. Molly Spring has BBQ picnic facilities, toilets and a car park with room to facilitate buses and vans.

Parry Lagoons Nature Reserve

The wetlands of this Nature Reserve provide important feeding and breeding grounds for many birds including some migratory shore birds from as far away as Siberia. Parry Lagoons has been listed on the Register of National Estate, and is a RAMSAR listed wetland of International significance.

In addition to the wetland of the Ord River flood plain, this 36,000ha reserve includes grasslands, woodlands and rugged sandstone outcrops and ranges.

Access

The main access road into the Reserve is Parry Creek Road which is approximately 20km south of Wyndham, off the Great Northern Highway. From the highway the road into the Reserve is gravel, corrugated and during the wet season prone to flooding. These roads may be closed without notice due to unseasonal rains.

Parry Lagoons Highlights and Facilities

Marlgu Billabong features a boardwalk and shaded bird hide that allows the traveller to take in the sights and sounds, of the many birds and maybe even a crocodile. Interpretive display boards assist visitors in identifying their surroundings and the many species which inhabit this beautiful area.

Purnululu National Park (Bungle Bungle)

The Bungle Bungle Range is renowned for its striking sandstone domes, striped with orange and grey bands. Purnululu is the name given to the sandstone area by Aboriginal people and covers an area of almost 240,000 hectares.

The Bungle Bungle Range has been a tourist destination since 1983 and was granted World Heritage status in 2003.

Access

Purnululu is typically open in early April until the 1st of December depending on weather conditions. The park may also be temporarily closed due to fires or unseasonal rain.

Access is restricted to **4WD only** and only SINGLE AXLE off-road or heavy-duty trailers, caravans and other towable units are permitted in the park.

2WD vehicles and DUAL AXLE trailers, caravans and other towable units ARE NOT permitted into the park and will be asked to leave.

Visitors must register at the Department of Biodiversity, Conservation and Attractions Visitors Centre on arrival.

Geology

The Bungle Bungle Range:

- Are an estimated 360 million years old.
- Rise over 200 metres high.
- Formed during the Devonian age.
- Carved over 20 million years through erosional forces.
- The grey banding is formed by cyanobacteria.
- The orange banding is the result of oxidised iron compounds within the layers.

Facilities

There are two Biodiversity, Conservation and Attractions campsites with basic amenities such as bush toilets and water. Visitors are advised to boil water prior to drinking. Campsites are non-powered.

Campground Bookings

Campground bookings can be made online at www.parkstay.dpaw.wa.gov.au. All visitors must register at the Department of Biodiversity, Conservation and Attractions Visitors Centre on arrival to the park.

Tour companies operate outside and within the park offering a range of guided walks, 4WD transfers, safari stays, accommodation and helicopter flights. Scenic flights are available from various locations along the Great Northern Highway between Halls Creek and Kununurra.

All tours can be booked through the Kununurra Visitor Centre.

Ngauwudu Management Area (Includes Mitchell River National Park)

The Ngauwudu Management Area is located in the far north of the Kimberley and is extremely remote. Visitors need to be completely self-sufficient as the area has few facilities. It is important to ensure that you carry sufficient water, food and fuel supplies. Camping and entry fees apply.

It is one of the most biologically important areas in the Kimberley. The landscape around the laterite-capped plateau varies from mangroves and wetlands, to woodlands and lush rainforest pockets. The area has a rich diversity of wildlife, with many rare animals, such as the Monjon (Australia's smallest rock wallaby) and the black grass wren.

The area contains many Aboriginal cultural heritage sites and features fine examples of the various forms of rock art.

Access

The Ngauwudu Management Area is restricted to 4wd vehicles only, via the Gibb River Kalumburu Rd and the Port Warrender track. The 85km Port Warrender track is narrow, winding and at times extremely rough with numerous washouts and corrugations.

Only Dry season access to the plateau is permitted. It is recommended that you contact the **Kununurra Visitor Centre** prior to departure to gain the up-to-date road reports in this region.

Aerial access is available from Drysdale River Station, Wyndham and Kununurra by way of numerous scenic flights.

Ngauwudu Highlights and Facilities

The Mitchell Falls are formed by a series of spectacular cascades and are best viewed just after the wet season, (May – July) when maximum water is falling. The falls normally flow all year round but by the late dry season (Sept-Oct) can be reduced to only a trickle. The total height of the falls is 150m.

There are numerous walk trails within the area and most are considered moderate to difficult. These walk trails take you to the Mitchell Falls, Merten's Gorge and into Surveyors Pool. The falls are hazardous; always stay away from cliff edges.

Campsites are located at the Plateau and also at the King Edward River (Munurru). Fees apply at both areas (visitors must buy an Uunguu Visitor Pass online from wunambalgaamberra.org.au before arrival) and both have basic toilet facilities. One private safari style tented camp is also available near the Mitchell Plateau airstrip.

4wd ground tours and aerial scenic flights (helicopter) are also available.

Scenic fixed wing flights can be arranged by the **Kununurra Visitor Centre** staff who can also advise of tour schedules and bookings if required.

Wolfe Creek Crater

On the edge of the Great Sandy Desert and the extensive spinifex grasslands of the East Kimberley lies the Wolfe Creek meteorite crater, the second largest crater in the world from which fragments of a meteorite have been collected. The crater is 880 metres across and almost circular. Today, the floor is about 60 metres below the rim, and is generally flat, but rises slightly in the centre. The porous gypsum found in this central area supports reasonably large trees and contains a number of sinkholes that may reflect the position of stress fractures formed by the impact from the meteorite.

Although it has long been known to Aboriginal people, who called it Kandimalal, the Wolfe Creek meteorite crater was only discovered by Europeans in 1947, during an aerial survey. The Aboriginal Dreaming tells of two rainbow snakes who formed the nearby Sturt and Wolfe Creeks as they crossed the desert.

Access

Wolfe Creek Meteorite Crater National Park is situated approximately 152km by road south of Halls Creek along the Tanami Road. When travelling to Wolfe Creek be prepared for unsealed roads, it is always recommended to travel in a 4wd vehicle due to the corrugations. Contact the **Halls Creek Visitor Centre** for up to date road conditions before travelling.

Facilities

There is a Department of Biodiversity, Conservation and Attractions campsite with basic toilets, however you need to be totally self sufficient for all your supplies. Please note there is no water available.

Ngarranggarni Barramundi

Dreaming Stories

Jaliwang Ngarranggarni (Miriuwung)

A barramundi lives in the river at Tharram (Bandicoot Bar).

One day a crane fishing for food sees the barramundi and spears it with her beak, but is unable to catch it as the barramundi swims quickly away.

The barramundi travels up the Dunham River, past where the Worrworrum community is today, and on to Glen Hill where she scrapes off some of her scales as she passes through.

Today, these scales can be seen near the Glen Hill community's first gate as white rock on the hillside, most clearly visible in the late afternoon.

Here the barramundi is spotted by some women who try to catch her using nets made of rolled Spinifex grass (a traditional Miriuwung fishing method known as Gelganyem).

But the barramundi flicks her tail and jumps over the trap. She escapes between the two hills of Barramundi Gap (Argyle Diamond Mine) and heads down to Bow River, where she comes to rest as a white rock. This rock, which can still be seen today, is quite different from all the others at Bow River.

- Story by Evelyn Hall - Artwork by Jodie Hall - Story provided by Ted Hall -
